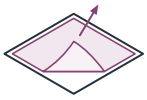
THE NINTH PANEL RULES

Display case for LEGO® set 72046

1 CHECK FOR FILM



Protective film may be present. It can be clear or coloured. Check both sides and remove any film before assembly.

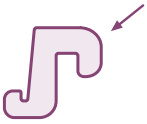
2 CHECK YOUR PARTS

Match all the pieces to the parts sheet before you start.

3 GENTLE TIGHTENING

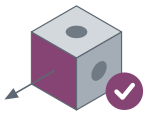
Slotted (flat-head) hand screwdriver, not included. A screwdriver head that snugly fits the screw head makes assembly easier than an ill-fitting one. Do not over-tighten.

4 FOLLOW THE PURPLE



Purple shows the part being added or featured in the step.

5 SMOOTH FACE FORWARD



The four cubes at the front of the case must have their smooth, hole-free side facing the front panel.

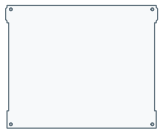
BEFORE YOU START

- Printed panels: remove protective film if present. Do not peel or scrape the printed artwork. **The colour side faces forward.**
- Peeling tip: if film is present, lift a corner with a fingernail and peel slowly. Do not use sharp tools.
- Part labels match the parts sheet; letters show the step order. Artwork colours are simplified in the drawings.

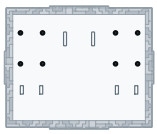
NINTH PANEL

CHECK YOUR PARTS

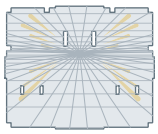
Part 1
Lid
1×



Part 2
Front panel
1×



Part 3
Printed border
1×



Part 4
Printed grid
1×
